

Top Picks 2007 Read Me Information for your HHICC Top Pick CD-ROM

Requirements: These programs will run with Windows 98, ME, or XP. It is generally recommended that your computer should have a Pentium 166 MHz or greater CPU, especially for Internet Explorer 6.0 and Netscape 7.1.

Disclaimer: The programs contained on this disk are provided as a service by the HHICC. We, of course, cannot guarantee that they will work on your system because of the vast array of different computer system configurations. You use these programs at your own risk. Therefore, HHICC, including anyone involved in the selecting the programs and creating the Top Picks disk shall not be held responsible or liable in any way for any physical, computer, financial or any other problems resulting from reading this document, installing the programs contained on the Top Picks disk, using any of the programs contained on the disk, or otherwise putting into practice any of the information or products on the disk. All programs contained on the disk are subject to human error and may be changed without notice.

The following programs have been added to this edition of the disk:

- Adobe Acrobat 8.0 (update)
- Advanced Windows Care
- Firefox Browser 2.0 (update)
- Hard Drive Cleaner
- Irfanview 3.9.9 (update)
- Network Magic
- Spybot 1.4 (update)
- Startup Inspector
- Startup Manager
- Windows Directory Statistics

The following reference table provides the address of the file used to load the Top Picks Programs. Open the folder containing the load program. Highlight the load program. Note that in some cases the load program may be located in a sub folder. Execute the program as appropriate in your operating system; i.e., in Windows 98 use Windows Explorer to find the program and either open the Run window and paste the address into the dialog box or double click on the program.

Many of the following program descriptions are adapted from the provider's product descriptions.

7-Zip 4.3.2 File Archiver: 7-Zip is a free high compression file archiver distributed under GNU LGPL. 7_Zip uses the new 7z format and LZMA compression. 7-Zip supports the following formats:

- Packing / unpacking: 7z, ZIP, GZIP, BZIP2 and TAR.
- Unpacking only: RAR, CAB, ISO, ARJ, CHM, Z, CPIO, RPM, DEB and NSIS.

For ZIP and GZIP formats 7-ZIP provides a compression ratio is 2-10% better than the ratio provided by PKZIP and WinZip. 7-ZIP format files are self-extractng.

7-ZIP also provides a powerful File Manager.

7-ZIP works in Windows 98/ME/NT/2000/XP. There is a port of command line version for Linux/Unix.

Ad-Aware 6.181: Pull the plug on adware and spyware with the latest version of this free tool. Ad-aware scans your system, including removable drives, for the most common types of advertising spyware and safely removes offending software. The program works through intuitively designed wizards. Currently, the utility detects small

ad programs from Adware, Aureate/Radiate, OnFlow, Comet-Cursor, Cydoor, Doubleclick, EverAd, Flyswat, OnFlow, TimeSink 5.0, and others.

This latest version (6.181) features a redesigned user interface as well as safeguards for users who may be overzealous in removing adware/spyware components. Because many ad-supported programs won't function if you remove their ad modules, you may occasionally want to overrule an earlier decision to remove one of these components. This latest release addresses this problem in two ways: It stores adware components in your Recycle Bin, where you can later retrieve them; and it provides a backup archive viewer for reviewing and, if necessary, restoring components you've removed. One feature in this latest release is the ability to search for new reference files automatically when Ad-aware is started.

As many of us know, "spyware" refers to small, hidden programs that are embedded in larger applications to report information to advertisers. These programs are included in some shareware and freeware programs because, unfortunately, that's the only way some software developers can pay their bills. If you don't want any part of this and feel that these hidden programs invade your privacy you should definitely consider downloading Ad-aware.

Ad-aware is free for noncommercial use. If you want to use it in a commercial, educational, or governmental environment, you must purchase Ad-aware Plus or Ad-aware Professional. These programs are available from the Lavasoft Web site.

Adobe Acrobat Reader 8.0

TOP FEATURES

- Simple and Easy to use Interface
- Create Secure PDF Documents
- Access Learning Resources
- View, Print and Search your PDF documents
- Search Single or Multiple PDF Files

Adobe® Reader® 8.0 software allows any user to create more secure PDF Documents. You can view, print, search, sign, verify, and collaborate on PDF documents, online as well as offline, from your home or office.

Generate Adobe PDF files that accurately represent the original document, and take advantage of robust tools for sharing information and commenting on electronic files.

Acrobat Reader 8.0 enables you to maximize your time and efforts. Create highly secured PDF documents in the comfort of your home or office. Allow users to access your document online with Adobe Connect.

Acrobat Reader 8.0 allows you to Create, View, Print and Access any PDF Documents. Start using the Power of Adobe Reader 8.0.

Note: Adobe Acrobat Reader 5.0.5 is also provided for use in slower computers.

Adobe Photo Shop Album 2.0: Adobe Photo Shop Album 2.0 provides an enjoyable and easy way to share photos, chat, create gift registries, send group e-mail, create discussion boards, share files and stay in contact with family and friends in your own personal community. It allows you to share photos on the web, via e-mail, or in print.

Advanced WindowsCare v2 Personal:

Advanced WindowsCare v2 Personal is a comprehensive PC care utility that takes a one click approach to help protect, repair and optimize your computer. It provides an all-in-one and super convenient solution for PC maintenance and protection. This fantastic program is available free of charge. Compared to its nearest competitor, Advanced WindowsCare Personal provides a more essential and practical solution for Windows maintenance.

Its features are:

- 100% Freebie
- Removes Spyware and Adware
- Prevents Security Threats
- Privacy Protection
- Fixes Registry Errors
- Temporary File Cleanup
- Start Cleanup
- Repairs Windows Problems
- Speeds up System

A professional edition (\$29.95) is also provided.

Agent Ransack: It's not always easy to remember the exact filename of your document, and opening each file to look inside can waste a lot of time. Agent Ransack displays the text found inside each file, so you don't have to separately open each search result. You can also search for text inside of documents using this application. Agent Ransack integrates into the Windows Find menu, so it can easily replace the File Search function included with Windows.

AOL Instant Messenger: AOL Instant Messenger provides the capability to chat with friends on the web and AOL. It provides the user with the facility to make your messages stand out with rich text and smileys. You can also transfer files, photos or music while you are instant messaging.

Atomic Clock: Atomic Clock is a freeware program that connects to one of the time servers operated by the US National Institute of Standards and Technology (NIST) and will set the time of the clock in your computer with the atomic time-scale operated by NIST. This program has an option to run in Automatic Mode. When this option is selected it will connect to the atomic clock once per day. If the computer is not connected to the Internet the program will continue to try to update the time until it succeeds. The overall accuracy should be +/- 0.5 seconds per day. This is a free service.

Audacity: Audacity 1.2.4 is a fully functional multi-track open source audio editor. It supports provides the capability to record live audio and convert tapes and records into digital recordings or CDs. WAV, AIFF, Ogg and MP3 formats. Features include envelope editing, mixing, built-in effects and plug-ins, all with unlimited undo. The user can cut, copy splice and mix sounds together. The user can also change the speed of a recording. Audacity will run on Windows 98, ME, 2000 and XP. It will run best on systems with a minimum of 64 MB of RAM and a 300 MHz processor.

Avery Wizard: The Avery Wizard provides a set of tools that facilitate formatting and printing labels, dividers and cards. The program is accessed from a button on the Word Tool Bar. The program prompts the user to provide the product, font, text, and alignment necessary to complete the project.

AVG 7: AVG Free Edition is the well-known anti-virus protection tool. AVG Free is available free-of-charge to home users for the life of the product! Rapid virus database updates are available for the lifetime of the product, thereby providing the high-level of detection capability that millions of users around the world trust to protect their computers. AVG Free is easy-to-use and will not slow your system down (low system resource requirements).

Highlights include:

- Automatic update functionality
- The AVG Resident Shield, which provides real-time protection as files are opened and programs are run
- The AVG E-mail Scanner, which protects your e-mail
- The AVG On-Demand Scanner, which allows the user to perform scheduled and manual tests
- Free Virus Database Updates for the lifetime of the product
- AVG Virus Vault for safe handling of infected files
- Great customer satisfaction!

Please note that any previous version of AVG Free will be un-installed automatically during the installation of the new AVG Free.

Note: This download is dated and will not reflect the latest virus list. The user should update the list before using the file.

Belarc: The Belarc Advisor builds a detailed profile of your installed software and hardware, including Microsoft Hotfixes, and displays the results in your Web browser. All of your PC profile information is kept private on your PC and is not sent to any web server.

Belarc runs on Windows 95/98/Me, NT 4, Windows 2000, XP and Windows Server 2003. It requires IE 3 or Netscape 3, and higher versions. It also runs on Opera. Belarc requires 619 KB of disk space.

Clean 2.01: This useful program can be used to remove extraneous data from an e-mail before forwarding it. Cleaning the text removes the space symbols (>) that appear before a line inside the forwarded message, spaces added to a line, and the addresses of past recipients. The resulting compressed message can be quickly reformatted. Commands are also available to remove HTML, symbols and headers.

Direct CD: The Universal Disk Format (UDF) Reader Driver enables multi-read CD-ROM/DVD-ROM drives to read Direct CD formatted CD-RW disks. UDF is a file system that lets the user read files from and write files to a CD in a CD-R or CD-RW drive. Once a disk is formatted as a Direct CD disk, files can be recorded by dragging them from Windows Explorer. The Save and Save As commands associated with application programs such as Word can also be used to write to the disk. CD-RW disks may be overwritten or incrementally written providing efficient back up capabilities. CD-RW disks can be used with the Backup utility supplied with Windows,

E Mail Stripper: This useful program can be used to remove extraneous data from an e-mail before forwarding it. Cleaning the text removes the space symbols (>) that appear before a line inside the forwarded message, spaces added to a line, and the addresses of past recipients. The resulting compressed message can be quickly reformatted. Commands are also available to remove HTML, symbols and headers.

Excel Viewer: With Excel Viewer 2003, you can open, view, and print Excel workbooks, even if you don't have Excel installed. You can also copy data from Excel Viewer 2003 to another program. However, you cannot edit data, save a workbook, or create a new workbook. This download is a replacement for Excel Viewer 97 and all previous Excel Viewer versions

Firefox 2.0:

The award-winning Web browser just got better. It's free and easy to use. Join the millions of people worldwide enjoying a better Web experience.

Surf faster and smarter!

The innovative Firefox[®] browser makes surfing the web faster and safer. With the included Google[®] Toolbar, features like AutoFill and SpellCheck will make browsing more convenient. Together, they'll change the way you use the Internet - for free.

Firefox 2 features include:

-
- **Tabbed Browsing**
Save time by viewing more than one page in a window
- **Pop-up Blocking**
Block annoying pop-up ads
- **Better Security**
Help keep computers safe from malicious spyware
- **Google Toolbar**
Enhanced search box suggests queries as you type

Flip Album Suite 5: This download provides a 30 Day Free Trial Version. The program allows the user to create and distribute 3D Page-Flipping Digital Albums on CDs. It is an excellent companion for your digital photos. It provides the capability to:

- Organize your photo collections into virtual albums and libraries
- Edit your photos
- Share your photo albums on CD or on the Web
- Print your photos on standard photo sizes or Avery[®] templates

Flip Album is fun and easy.

Step 1: Open A Folder of Pictures

Your digital albums will automatically be created, complete with a default theme to spice up your album. A theme consists of album front and back covers, page and book backgrounds, and page separators.

Step 2: Customize Your Digital Album

Personalize your digital albums with additional theme options, borders, frames, text, annotations, MP3 files, video files & more.

Step 3: Export and Share

Share your digital albums on CD or Upload and Share your albums on the Internet with friends and family (for non-commercial distribution).

Users simply pop the CD into their PC, or Video CDs into their DVD players to view your albums instantly. No software installation is required on the PC.

Your FlipAlbum® CD will not crease and deteriorate over time. So, Why waste valuable time and money with physical photos albums which turn yellow with age and are expensive to copy when you can use FlipAlbum® 5 Suite to share your precious photos on CD albums with others?

Google Programs:

Google Desktop Search: Google Desktop Search is how our brains would work if we had photographic memories. It's a desktop search application that provides full text search over your email, computer files, chats and web pages you've viewed. By making your computer searchable, Desktop Search puts your information easily within your reach and frees you from having to manually organize your files, e-mails and bookmarks.

After you download Google Desktop Search, the application creates an index of all your searchable information and stores it on your computer, allowing you to search your personal items as easily as you search the Internet using Google. Unlike traditional computer search software that updates once a day, Desktop Search updates continually for most file types; when you receive a new email in Outlook, for example, you can search for it within seconds.

Google Desktop Search also introduces new ways to access information, organizing email search results into conversations so that all messages in the same thread are grouped into a single search result, and keeping "cached" copies of everything you see, so that you can view older versions of documents and web pages even if you're not online.

Desktop Search now lets you search your

- PDF files
- Multimedia files, including audio (MP3, WMA, WAV and more), images (JPG, GIF, PNG, BMP and more), and videos (AVI, MPG, WMV, and more), by meta-tag. For instance, you can search by song title or artist name.
- Web pages you've viewed using the Netscape 7+, Mozilla and Firefox browsers
- Email from Netscape Mail, Mozilla Mail and Thunderbird

Google Picassa 2: Picasa is software that helps you instantly find, edit and share all the pictures on your PC. Every time you open Picasa, it automatically locates all your pictures (even ones you forgot you had) and sorts them into visual albums organized by

date with folder names you will recognize. You can drag and drop to arrange your albums and make labels to create new groups. Picasa makes sure your pictures are always organized.

Picasa also makes advanced editing simple by putting one-click fixes and powerful effects at your fingertips. And Picasa makes it a snap to share your pictures – you can email, print photos home, make gift CDs, instantly share via Hello™, and even post pictures on your own blog.

Google Toolbar: The Google Toolbar is a powerful tool that provides the ability to:

- Search the Web from whatever page you're on;
- Block pop-ups;
- Fill in online forms;
- Personal your search engine options; and
- Highlight your search terms on every page you visit.

GoZilla 4.11: GoZilla Free is an Internet file management and retrieval system that lets you gather URL links for files you want to download simply by dragging them from your browser. It also allows you to instantly see file sizes, estimated download times, and network connection performance. Add as many different download locations for a file as you can find--when GoZilla retrieves the file for you, it will check all available locations and deliver the fastest possible connection. Multiple FTP search engines are included for finding files and mirror sites. Downloads can even be scheduled for later, when network traffic dies down. GoZilla features SmartUpdate, which lets you monitor your favorite programs for updates and announcements; a folder-based, Windows Explorer-like interface in which to manage your categories; download optimization; persistent connections; and customizable user windows.

HDCleaner 2.364: HDCleaner clears the fixed disk and removes unnecessary file garbage from all available drives. The most important groups of files, about BAK, CHK, GID, *.* , TMP, are pre-configured and can be directly selected. After the drives are selected, HDCleaner starts scanning and performs data searches. Individual files can be included or excluded in the search procedure.

Hard Scrub 2.1: When you delete a file from a drive, the pointer to the file is removed but the contents of the file remain on the drive. To truly erase the file, you must write over it. Summits Hard Disk Scrubber writes over the files. The Hard Scrub option writes over the files selected three times, rendering them unreadable by all but the most sophisticated data recover hardware. Note this file is in zip format and may require the user to install WinZip before installing Hard Scrub.

HP Photo Manager: HP Photo Manager allows you to quickly create an online photo album. The program provides tools to facilitate uploading photos from your PC to

the Web. You can also e-mail photos to your friends and family, send an e-postcard combining your photos with a text message and create greeting cards.

Internet Explorer 6.0: Internet Explorer 6.0 is the latest version of Internet Explorer. Open the Ie6 folder and then open the i386 folder. Double click Setup.exe. Select “Install Internet Explorer 6 and Internet Tools. Follow the on screen instructions and to complete the installation.

Internet Explorer 6 is a set of core technologies in Windows® XP Home Edition and Windows XP Professional, and is available to users of Windows 98, Windows 98 Second Edition, Windows Millennium Edition (Windows Me), Windows NT® Workstation 4.0, and Windows 2000 Professional operating systems. Internet Explorer 6 includes many new and enhanced features that can simplify the daily tasks that you perform. It also helps you to maintain the privacy of your personal information on the Web.

Web Privacy: Internet Explorer 6 includes many new and enhanced features to simplify tasks you perform each day on the Web, while also helping you to maintain the privacy of your personal information.

Flexibility: With the new innovative browser capabilities including Media Bar, Image toolbar, Auto Image resizing and more, you can experience the Web the way you want.

Reliability: Internet Explorer 6 offers a more stable and error-free browsing experience than ever before. New fault collection services help identify potential problems that need to be fixed in future updates to Windows Internet technologies. New fault collection services help to identify potential problems that need to be fixed in future updates to Windows technologies.

Internet Explorer 6 lets you control how your personal information is used by the Web sites you visit, so you don't have to worry about security or privacy. You can now control the information web sites collect about you.

It extends the Windows platform to enable developers to build Web-based applications and develop informative content. DHTML standards have been enhanced.

IRFAN VIEW IMAGE EDITOR 3.9.9:

IrfanView is a fast and compact image viewer/converter. It is simple to use by beginners and still powerful for professionals. It supports a great number of file formats and features.

Features include: Multilanguage support, Thumbnail option, slideshow, fast directory browsing, batch conversion/editing, multipage editing, file search change color depth, scanning, cut/crop, IPTC edit, capturing, lossless JPG operations, effects, (sharpen, blur, Adobe Photoshop filters), EXE/SCR creating, many hotkeys, command line options and plugins.

Version 3.9.9 introduces a host of updates including support for PDF export; new Thumbnails option; Load file list from TXT; support for new formats (SIF, PVR, AWR); zooming and scrolling is now possible in slideshow mode.

Note: IrfanView is now bundled with Google Toolbar and Google Desktop Search. Installation of these components is optional.

Note: To remove prior versions of IrfanView prior to installing this version execute the command sequence. Start, Programs, IrfanView, Uninstall IrfanView

This image editor can help you improve the appearance of your jpg and gif images. It is fast and fairly simple to use. The current level also preserves all of the features of previous versions including:

- TIF save option: Save all pages from original image
- Batch option: Apply changes to all image pages
- Edit multipage TIF
- Option to sort thumbnails using EXIF date
- Option to sort thumbnails using image width/height
- Custom Rotation
- JPG Transformation dialog option: Auto rotate
- Option to show full file path in the title bar
- HTML dialog option: Choose folder with templates
- Ability to paste text from Clipboard as an image

IRFAN VIEW Plugins 3.9.9: Install the plugins to get additional special effects. The lossless rotations are particularly valuable.

Juno 5.0: Juno provides an excellent source of email for those without an Internet connection. A free, advertiser-supported program, it has a simple, easy-to-use interface that will let anyone with a modem send and receive email. You can set up multiple accounts, store often-used email addresses in an address book, spell-check your messages with a built-in spelling checker, save messages in custom folders, click on some of the advertising to be taken to the sponsor's website, and more. Juno can also be used with your TCP/IP connection so that you can use it on a LAN. Although program setup can be lengthy (due to the amount of demographic information required by advertisers), it's easy

to go through, with those areas that might cause problems for a novice handled automatically.

Juno also has a free and premium Internet service options. The premium service provides, for a monthly fee, less advertising and improved service. High volume users of Juno's free service may find their access time limited. A new agreement requires users of its free service to allow downloading of software that would perform computational tasks unrelated to Internet connection. They must also agree to leave their computers on all the time if asked. Juno would have the right to initiate a telephone connection from your computer to Juno's central computers. Note also that removing the advertising files will disable Juno.

Keyfinder: The Magical Jelly Bean Keyfinder is a freeware utility that retrieves your Product Key (cd key) used to install windows from your registry. It has the options to copy the key to clipboard, save it to a text file, or print it for safekeeping. It works on Windows 95, 98, ME, NT4, 2000, XP, Server 2003, Office 97, Office XP and Windows Server 2003.

Meazure 2.0: What are the dimensions of that image? How big is this window? Does this layout fit on an NTSC display? What color are these pixels? What does this icon look like close up? How can I capture an arbitrary portion of the screen? Meazure is a program that measures, magnifies and captures the screen by providing a battery of features in a cohesive user interface. Even better, Meazure is free!

Features:

- Measure objects on the screen such as images, windows and icons
- Capture arbitrary portions of the screen
- Magnify the screen up to 32X magnification
- Read the color of a screen pixel in RGB, hex RGB, CMY, CMYK, HSL, YCbCr, YIQ
- Display rulers anywhere on the screen
- Display a grid overlay on the screen with adjustable grid spacing
- Measure using a number of units including pixels, points, twips, centimeters, or user-defined
- Record measurements to an XML file for later playback or external processing
- Calibrate screen resolution to provide accurate measurements
- Save and restore measurement tool positions using Profiles

- Use predefined Profiles for common screen and video sizes such as NTSC and PAL

Configure the user interface to show only the information you need

MinMax Extender: This program provides additional control for your window sizes. The first time you run the program, you'll view the options dialog box and save the changes. The next time you open it, it'll take effect on any windows opened thereafter. If you have a window open before running it, the new icons won't appear. The icons are similar to the minimum, maximum, and close boxes and they're located next to them. The new icons provide stretch, stay on top, minimize to the system tray, and shade the window. The stay on top is great for when you have an e-mail open and want it to stay on top while referencing it in another document so it won't take away the focus.

Music Match Juke Box: Music Match 6.10 provides a top quality jukebox. It can play MP3s, CDs and streamed video; rip record CD-quality MP3s, burn user defined CDs and print CD covers. It can also convert audio WAV files to MP3s and MP3s to audio WAV files. This is the free version of the software. An upgrade file with more features is available for a fee.

Netscape 7.1: Netscape 7.1 builds on Netscape 7.0 to provide both significant improvements to performance and stability as well as a number of important new features. The new features include:

- Popup controls. You determine whether popup windows are allowed or suppressed on any given web site or on all sites.
- Using a group of tabs as a home page. Tabbed browsing, introduced in Netscape 7.0, allowed you to open several tabbed pages on a single screen. You can now specify that such a group of tabs be used as your home page.
- COPPA compliance. Netscape now provides greater safety for younger users through compliance with the Children's Online Privacy Protection Act (COPPA) of 1998.
- Increased flexibility in using AOL mail within Netscape. You can set up your AOL mail account through Netscape Mail & Newsgroups. Now you can take advantage of important AOL mail features such as the ability to unsend messages, check message status, and mark mail as unread.
- Increased control on managing certificates. If a web site displays a certificate from a certificate authority you don't know, you now have the opportunity to accept or reject the certificate.

- Palm syncing with Netscape 7.1 address books.

Network Manager:

Network Magic simplifies sharing printers and files across all of your home computers. No more emailing files to yourself just to print them out. Network Manager automatically links all of your computers, printers, and other devices together over your wireless or wired network. Plus it includes wireless network repair and protection features to keep you connected and secure.

What can Network Manager do for you?

Automatic printer sharing and simplified file sharing

Troubleshoot slow internet connections with the Internet Speed Test

Repair your internet connection (wired or wireless) when it breaks

Protect your wireless network from intruders

Remote Access to your shared files

Page Tutor: If you're like many people, you've thought about making your own web page. Also, if you're like many people, you may have looked at some of the coding behind those pages and thought "I could never do that." Well, guess what? You can, it's not as hard as it looks. You'll be happy to learn that it's really pretty simple.

Page Tutor is a simple tool that guides you through the process of creating a web page.

PDF995: The Pdf995 suite of products - Pdf995, PdfEdit995, and Signature995 - is a complete solution for your document publishing needs. It provides ease of use, flexibility in format, and industry-standard security at no cost.

Pdf995 is the fast, affordable way to create professional-quality documents in the popular PDF file format. Its easy-to-use interface allows you to create PDF files by simply selecting the "print" command from any application, creating documents which can be viewed on any computer with a PDF viewer. Pdf995 supports network file saving, fast user switching on XP, Citrix/Terminal Server, custom page sizes and large format printing. [Download Now.](#)

PdfEdit995 offers a wealth of additional functionality, such as: combining documents into a single PDF; automatic link insertion; hierarchical bookmark insertion; PDF conversion to HTML or DOC (text only); integration with Word toolbar with automatic table of contents and link generation; auto attach to email; stationery and stamping.

Signature995 offers state-of-the-art security and encryption to protect your documents and add digital signatures.

The Pdf995 Suite offers the following features, all at no cost:

- Automatic insertion of embedded links
- Hierarchical Bookmarks
- Support for Digital Signatures
- Support for Triple DES encryption
- Append and Delete PDF Pages
- Batch Print from Microsoft Office
- Asian and Cyrillic fonts
- Integration with Microsoft Word toolbar
- PDF Stationery
- Combining multiple PDF's into a single PDF
- Three auto-name options to bypass Save As dialog
- Imposition of Draft/Confidential stamps
- Support for large format architectural printing
- Convert PDF to JPEG, TIFF, BMP, PCX formats
- Convert PDF to HTML and Word DOC conversion
- Convert PDF to text
- Automatic Table of Contents generation
- Support for XP Fast User Switching and multiple user sessions
- Standard PDF Encryption (restricted printing, modifying, copying text and images)
- Support for Optimized PDF
- Support for custom page sizes
- Option to attach PDFs to email after creation
- Automatic text summarization of PDF documents
- Easy integration with document management and Workflow systems
- n-Up printing
- Automatic page numbering
- Simple Programmers Interface
- Option to automatically display PDFs after creation
- Custom resizing of PDF output
- Configurable Font embedding
- Support for Citrix/Terminal Server
- Easy PS to PDF processing
- Specify PDF document properties
- Control PDF opening mode
- Free: Creates PDFs without annoying watermarks
- Free: Fully functional, not a trial and does not expire

Pdf995 has over 5 million satisfied customers and over 1000 Enterprise licenses sold worldwide.

From start to finish, the Pdf995 family products are easy-to-use, powerful, and reliable.

These free versions display a sponsor page in your web browser each time you run the software. If you would prefer not to see sponsor pages, you may upgrade by obtaining individual license keys for each product at any time for \$9.95 each. A suite license for all three products is also available for \$19.95. Licensing also entitles you to technical support (response within 24-hours) via e-mail.

The Pdf995 suite runs on Windows 95, 98, 2000 and Me, NT 4.0 and XP.

Power Point Viewer: PowerPoint Viewer 2003 lets you view full-featured presentations created in PowerPoint 97 and later versions. This viewer also supports opening password-protected Microsoft PowerPoint presentations. You can view and print presentations, but you cannot edit them in the PowerPoint Viewer 2003.

Print Screen: RAMPrint Screen 2.0 provides a utility that allows the user to print the screen displayed on the monitor.

Ram Idle: RAM Idle LE is a smart memory management program that will keep your computer running more efficiently, faster, and longer. The program's intelligently manages the free RAM that is available to Windows, and prevents your computer from running progressively slower over time.

The program's System information capability presents you with detailed information about your system. This data can be instrumental in determining if you have the system requirements to install new hardware or software.

Real Player 8 Basic:

Real: This download provides the Basic is your ear onto the Internet. Play over 100 radio stations; streaming video; supports MP3, has an Auto Update feature; built-in help, additional playback formats;

Minimum System Requirements: Windows: 90MHz Intel® Pentium® processor or equivalent; 16MB of RAM; 14.4Kbps modem (audio only); 28.8Kpbs modem (video); 16-bit sound card and speakers; 65,000-color video display card (video); Win 95, Win 98 or Win NT operating system; Internet connection and web browser.

Macintosh: Mac* OS 8.1 or later; 32 MB RAM; 65MB virtual memory; 604 PowerPC* (200 MHz or better); Internet connection; Browser support: Microsoft* Internet

Explorer* 4.01 or later or Netscape* 4.05 or later.

Real Jukebox 2 Basic: Put your CD collection on your PC. Download exclusive, free songs for RealJukebox users. Find and download music from the Web, including MP3 songs. Record CDs at high speed (up to 7x faster than playback speed). Listen to music while you record. Easy one-click song downloads with the "Get Music" feature. Create and save Playlists for any occasion. Sort and manage thousands of songs and hundreds of CDs. Automatically downloads CD track, artist, and album information. Automatically indexes songs by artist, album, and genre. Sort by artist, genre, song title, and more. Import existing music files and Playlists. Edit song information. Organize music by Artist/Album, Genre/Album, and Genre/Artist.

Real Download 4 Basic: This program can help make any download faster and easier. It will automatically download music, video, software, games and many other file types. It provides an automatic download feature.

Spinner: Spinner is another Internet radio. Note that Spinner does not provide an Uninstall utility and may be difficult to remove.

Real Player 8 Basic, Real Jukebox 2 Basic, Real Download 4 Basic and Spinner are a free downloads. You may wish to purchase the full Plus versions from <http://www.real.com>. Just check out the web site to find what the advantages are of purchasing your media player.

Restoration: Restoration is an easy to use and straight forward tool to undelete files that were removed from the recycle bin or directly deleted from Windows. Upon Start, you can scan for all files that may be recovered. You can also limit the results by entering a search term or extension. In addition, it also provides the option to wipe the found files beyond simple recovery. The program is small and stand-alone. It does not require installation and can also be run directly from a floppy disk or this CD. Restoration works with FAT and NTFS as well as digital cameras and cards.

SpamBayes: SpamBayes will attempt to classify incoming email messages as 'spam', 'ham' (good, non-spam email) or 'unsure'. This means you can have spam or unsure messages automatically filed away in a different mail folder, where it won't interrupt your email reading. First SpamBayes must be trained by each user to identify spam and ham. Essentially, you show SpamBayes a pile of email that you like (ham) and a pile you don't like (spam). SpamBayes will then analyze the piles for clues as to what makes the spam and ham different. For example, different words, differences in the mailer headers and content style. The system then uses these clues to examine new messages.

For instance, the word "Nigeria" appears often in spam, so you could use a spam filter that identifies anything with that word in it as spam. But what if your business involves

writing a guidebook on Nigerian Wildlife Conservation? Clearly a more flexible approach is necessary. Additionally spammers will adapt their content over time and will no longer use the word "Nigeria" (or the words "Lose Weight Fast", or any number of other common lines). Ideally the software will be able to adapt as the spam changes.

So, that is what SpamBayes does. It compares the spam and the ham and calculates probabilities. For instance, for me, the word "weight" almost never occurs in legitimate email, but it occurs all the time in 'lose weight fast' spam. SpamBayes can then look at incoming email, extract the most significant clues and combine the probabilities to produce an overall rating of "spamminess". It flags the messages so that your mailer can handle the different message types. You might set it up so that ham goes straight through untouched, spam goes to a folder that you ignore (or delete without checking) and the unsure messages go to another folder that you can review for errors.

Spybot Search and Destroy 1.4: Spybot Search & Destroy detects and removes a multitude of adware files and modules from your computer. Spybot can also clean program and Web usage tracks from your system, which is especially useful if you share your computer with other users. Modules chosen for removal can be sent directly to the included file shredder, ensuring complete elimination from your system. And, for advanced users, it allows you to fix Registry inconsistencies related to adware or malicious program installations. The handy online update feature ensures that Spybot always has the most current and complete listing of adware, dialers, and other uninvited system residents.

Version 1.4 adds a variety of new and updated features, including an immunization option that allows you to block many spyware downloads before they get to your computer, and improved detection mechanisms for morphing files.

StartupRun 1.22: StartupRun is a handy utility program that displays the list of all applications that are loaded automatically when Windows boots. For each application, additional information is displayed (Product Name, File Version, Description and Company Name), in order to allow you to easily identify the applications that are loaded at Windows startup. If StartupRun identifies a spyware or adware program that runs at startup, it automatically paints it in pink color. In addition, it allows the user to Edit, disable, enable and delete the selected startup entries. You can also save the list of startup items in a text or html file, and add a new startup entry to the Registry.

Tweak UI: Microsoft has put together a set of productivity tools called Power Toys. These tools are unsupported which means that Microsoft Technical Support is unable to answer questions about them.

The Tweak UI 1.33 update allows the user to adjust your Windows User Interface, including menu speed, window animation, and Microsoft Internet Explorer. There are separate programs for Windows 98 and XP applications.

WebWasher®: WebWasher® filters out unwanted advertising and protects the surfer's privacy by filtering cookies, referrer strings and Web bugs. Its standard filters prevent unwanted data objects on Web pages from being loaded. The following configurable functions are available:

Dimension filter: Filters unwanted advertising banners. New sizes can be added at any time.

URL filter: Activates WebWasher®'s integrated URL filter. You can add new objects for other URLs at any time by mouse click.

Pop-up windows: Eliminates any pop-up windows contained on Web pages.

Scripts: Suppresses the execution of scripts that are executed when Web pages are loaded or closed.

Animations: Animated graphics can be entirely eliminated. Alternatively, you can specify the number of repetitions of an animation or that only the first picture should be displayed.

WebWasher® provides filters for protecting privacy prevent information about users from being forwarded to third parties without their knowledge.

Web Bug Filter: Filters small, invisible graphics that are hidden in documents and trigger sending messages to third parties. Web bugs are used by professional data collectors to create a user profile from watching your surfing habits.

Referer Filter: Prevents third parties from following data tracks left by users on the Internet. These indicate, for example, the page from which you access another page or the domain from which you have come. It also prevents the disclosure of your search queries to third parties.

Cookie Filter: Prevents your browser from the unwanted transmission and receipt of cookies over the Internet. Cookies allow you to be explicitly identified over the Internet. The cookie filter allows you to classify cookies as good, bad, or neutral. This makes it possible for you to use “good cookies” for activities such as home shopping and to filter out cookies that spy on your Internet activities.

Access Control: Provides the user with controlled access to the Internet so that desired information gets through and unwanted Web pages and data are blocked.

Negative Lists: Access Control blocks access to unwanted Web pages so that explicit and illegal sites are not accessible. It is also possible to prevent the download of certain forms of data such as software programs or music files.

Positive Lists: Completely blocks access to the Web so that only specific websites are permitted.

Winamp 3.0: Winamp is an audio player that can handle audio CDs, MP3 audio files, and streaming audio broadcasts. It combines extensive functionality with an intuitive interface. Winamp features a playlist editor and a 10-band graphic equalizer with user-definable presets that can automatically load specific files. It also includes Windows Media Technology 4.0 input/output support and the industry-standard Fraunhofer MP3 decoder. This download no longer includes VIS/DSP plug-ins; you can download them separately.

Version 3.0 features upgraded unzip and decompress support and improved multiple instance detection code.

WinDirStat: The WinDir Stat is a disk usage statistics viewer and cleanup tool for Microsoft Windows.

WinDirStat reads the whole directory tree once and then presents it in three useful views:

- The directory list, which resembles the tree view of Windows Explorer but is sorted by file/subtree size,
- The treemap, which shows the whole contents of the directory tree straight away,
- The extension list, which serves as a legend and shows statistics about the file types

Features include:

- Coupling. Select an item in the directory list: the treemap highlights it; and vice versa.
- Zooming
- Built in cleanup actions including Open, Show Properties, Delete.
- User defined cleanups
- Works with network drives and UNC paths
- “Create disk usage report” option
- Online help

Windows Media Player 10: Windows Media Player 10 gives you more music and more choices, and for the first time makes it possible to sync high quality music, video, and photos to the latest portable devices. A whole new look gives you quicker and easier access to your favorite digital media.

Win Patrol: Win Patrol actively monitors your system and allows you to see startup programs, Internet Explorer addons, scheduled tasks, active tasks, and cookies.

Win-splice: This program provides the capability to split large files so that they can be copied onto multiple floppy disks. Note: This program must be unzipped prior to installation. The user may need to install Winzip to provide this capability.

Winzip 8.1: This program provides the capability to zip and unzip compressed files. This version is a 21-day evaluation program.

WinZip is a straightforward, fast, and easy-to-use zipping and unzipping utility that includes built-in support for popular Internet file formats such as ZIP, TAR, UUencode, XXencode, BinHex, MIME, and Unix-compressed files.

The optional Wizard guides the user through the most common tasks involving Zip files. The award winning Classic interface features tight integration with Windows.

The latest version, WinZip 8.1, continues to improve integration with Windows Explorer via expanded, configurable Explorer context menu items--and you can now select multiple Zip files for extraction in a single operation from the Explorer window. For those who have problems with limited size of e-mail attachments, or who want to split up large downloadable Zip files, the new split Zip file feature allows you to split Zip files into multiple parts of a size that you specify. The new WinZip taskbar tray icon gives you instant access to recently opened Zip files and other WinZip features. Windows XP users will appreciate WinZip 8.1's support of new XP features.

Word Viewer 2003: Word Viewer 2003 lets you open Word 2003 documents created with all previous versions of Microsoft Word for Windows and Microsoft Word for Macintosh. In addition to Word document files (.doc), you can also open files saved in the following formats:

- Rich Text Format (.rtf)
- Text (.txt)
- Web Page formats (.htm, .html, .mht, .mhtml)
- WordPerfect 5.x (.wpd)
- WordPerfect 6.x (.doc, .wpd)
- Works 6.0 (.wps)
- Works 7.0 (.wps)
- XML (.xml)

With Word Viewer 2003, you can view, print, and copy document contents to another program. However, you cannot edit an open document, save a document, or create a new document. This download is a replacement for Word 97 Viewer and all previous Word Viewer Editions.

Wzipse: Wzipse makes self-extracting/installing programs out of zips, will allow you to add popups to the .EXE, a real nice touch. This program is especially valuable to Windows ME and XP users as those operating systems do not provide a way of making self-extracting executable files.

WP2000 Update: This download is a collection of upgrades to Corel Word Perfect.

WS_FTP95LE: Anyone who has ever uploaded a file to a website knows that one of the file transfer protocol or FTP programs best known is Ipswitch's WS FTP. This is their light edition evaluation version 5.08. It is a small program but very powerful. You can easily upload your files to a permanent location on the World Wide Web. For more information on FTP in general you can go to www.ftpplanet.com. This is a community site dedicated to FTP with articles, in-depth guidebooks and WS_FTP Tutorials.

Zipper: No description is available for this program but users have reported it to be an effective zip program.

ZoneAlarm 5.5: With the continuing and annoying hackers creating viruses and the advent of 24/7 Internet connectability through DSL or Cable Modem, we are always looking for ways to protect our systems. This award-winning ZoneAlarm Internet security utility increases security for Internet-connected personal computers with its unparalleled ease of use and strong protection features.
